Before Class 7

(A preparation for the class—nothing here is for credit, but it’s strongly recommended)

1. Work through these slides.

2. Read section 4.3 in the textbook. Then try exercise 21 on page 106.

3. Try the items in Before Class 7 MP (that’s a Mastering Physics assignment). As always with the MP items, work as many of them as you need to in order to have a firm understanding.
