

Physics Senior Thesis

October 19, 2018

<https://physics.oregonstate.edu/wic-thesis-course-information>

Physics Major Timeline

- Junior Year
 - Paradigms
 - Computational Physics
 - Electronics Lab
 - Research
- Senior Year
 - Capstones (EM, QM, Thermo, Optics)
 - Senior Thesis
 - Electives
 - Job / Grad School

Jobs

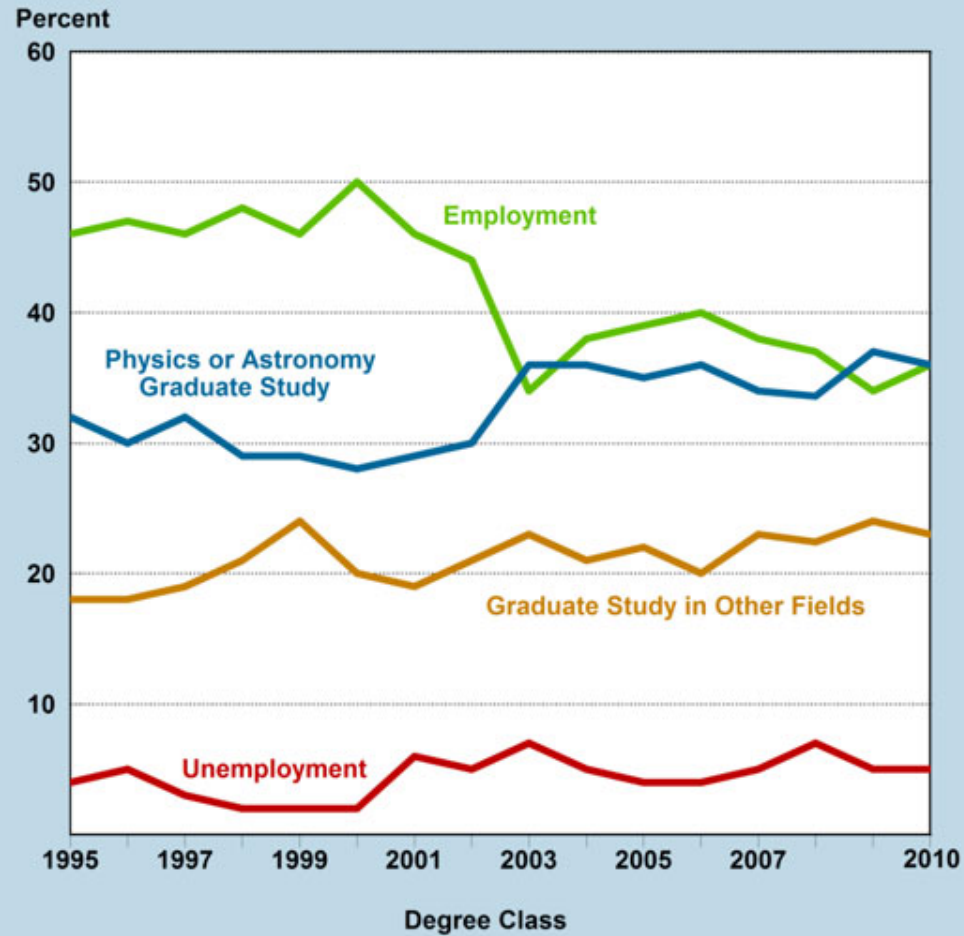

- Oregon: HP, Intel, InFocus, ESI, Solar World...
- Washington: Boeing, Microsoft, Yahoo, ...
- California: Silicon Valley, LA Aerospace, ...

- Career Fair: <https://career.oregonstate.edu>
 - October 17-18, 2018 CH2M Hill Alumni Center
 - February 20, 2019 CH2M Hill Alumni Center
 - April 24, 2019 CH2M Hill Alumni Center

Jobs

Trends in Status One Year After Earning a Physics Bachelor's,
Classes 1995 through 2010

<http://www.aip.org/statistics>

Graduate School

- Physics, Applied Physics, Engineering, ...
- M.S. , Ph.D.
- Research Experience as UG
- Letters of Recommendation (3+)
- GRE
 - General: Computer based, anytime
 - Physics: paper-based: September, October, April
- Finance: TA/RA, Fellowship (NSF, DOE, etc)

Graduate School Info

- GRE: www.ets.org/gre

Graduate School Timeline

- GRE
 - General: Computer based, anytime
 - Physics: paper-based: **September, October, April**
- Applications due: Jan 1 approx
- Letters of Recommendation (3+, 4 weeks notice)
- Fellowship apps
- Acceptance date: Feb, March approx
- Visit campuses: March, April
- Decision date: 15 April
 - <https://cgsnet.org/april-15-resolution>

Senior Thesis

- OSU Baccalaureate Core
- Writing Intensive Course (WIC)
 - Major specific
 - Physics majors: PH 403 (3) thesis

Senior Thesis Requirements

- Physics Research - 3 units PH 401 (Jr/Sr)
- Writing Intensive Course (WIC)
 - PH 403 Thesis
 - 1 unit Fall term of Senior year
 - 1 unit Winter term of Senior year
 - 1 unit Spring term of Senior year
- **THESIS**

OSU WIC Guidelines

- <http://wic.oregonstate.edu/wic-thesis-option>
- The thesis must be written in the student's major, or in the case of a student with an interdisciplinary major, in a subject area relevant to the major.
- Students in a major who are writing a thesis will meet together regularly in a group, with faculty leadership, to discuss and demonstrate understanding of issues related to writing in the discipline; to discuss and demonstrate familiarity with a variety of types of writing used by those working in the field (for example, writing done for various audiences); and to participate in peer review of ongoing drafts of writing projects in the major.
- The person leading the thesis writing group will be a faculty member in the discipline rather than a graduate teaching assistant.
- Students writing a thesis will gain experience in the steps involved in the process of writing a large document over time. Documents in the process might include: thesis proposal or project description, update memos to the committee or faculty mentor, literature review, drafts of required thesis sections on which the student received feedback, a whole draft with feedback, and a final polished version.

OSU WIC Guidelines (contd)

- Thesis writers will receive instruction in revising their writing and will perform significant revision of their writing.
- Thesis writers will have opportunities (perhaps in the thesis writing group) to use informal, minimally graded or ungraded writing as a mode of learning and understanding content.
- Thesis writers will write at least 2000 words of polished writing that has gone through revision in response to feedback, and a total of 5000 words including drafts. Graphics are not included in the word count. Drafts to prepare for an oral presentation can also be counted in the 5000 words.
- Thesis writers will demonstrate in their thesis the ability to integrate and document information from outside sources.
- Students receiving WIC credit in a thesis option will take a minimum of three hours of thesis/research credit.
- It is recommended that at least one person in a department offering a WIC thesis experience have taken the WIC Seminar in order to be familiar with current research and pedagogies for helping students become better writers.

Research Options

- OSU Physics Faculty
- OSU Faculty in other depts
 - Engineering
 - Oceanography
 - Chemistry
 - Ag
 -
- Internships (need OSU co-advisor)
- REU (need OSU co-advisor)

REU

- Research Experience for Undergraduates
 - 8-10 weeks

- NSF

<http://www.nsf.gov/crssprgm/reu/>

http://www.nsf.gov/crssprgm/reu/list_result.cfm?unitid=69

- Stipend + Expenses (housing, travel)

- OSU URSA Engage \$\$\$

<https://apli.oregonstate.edu/research/programs/ursa-engage>

<https://apli.oregonstate.edu/research>

Internships

- <http://www.science.oregonstate.edu/node/111>
- <https://www.nrel.gov/careers/suli.html>
- <http://science.energy.gov/wdts/suli/>
- <https://www.energy.gov/student-programs-and-internships>

- <http://www.nasa.gov/audience/forstudents/index.html>

PH 403 Activities

PH403 (Thesis) concerns the writing aspect of the research, and students enroll in 1 unit of PH403 in each of Fall, Winter and Spring of the senior year. You will need permission from the Physics office to register. These three total credits satisfy the OSU Writing Intensive Course (WIC) requirement of the OSU Baccalaureate Core requirement. Students meet weekly as a group to write, critique, and revise their writing. They also discuss and write about issues relating to ethics, types of science writing, and logical presentation of ideas. In Winter and Spring, activities focus on the thesis itself, including significant time devoted to the writing and revision of the thesis. Steady progress and continual peer and advisor review are expected throughout. A typical thesis is about fifteen to twenty pages, or about 3,000 to 5,000 words. The goal is to have the thesis ready by week 6 of Spring term. This means that research should be substantially complete by the end of Winter term of the senior year.

After the written thesis is complete, class time is devoted to preparing 10-minute oral presentations, the standard at physics conferences. In the final week of Spring term, there is a mini-conference where students give oral presentations on their projects to the department.

Senior Thesis Outline

- 1 Title, abstract, PACS.
- 2 Introduction: Why is topic important? How does it relate to the real world? How does it add to our knowledge base?
- 3 Previous work: survey of what has been done before.
- 4 Methods: description of theory, equipment, computational tools, etc.
- 5 Results
- 6 Discussion: What do the results mean? How do they relate to previous work?
- 7 Conclusion: What have we learned? What should be done next?
- 8 Bibliography
